

AHA and GREEN TEA COLLAGEN VEIL
Stimulates cellular renewal and rejuvenation of the skin
Glycolic Acid is a natural skin exfoliator that encourages the development of new healthy-looking skin and reduces wrinkles and fine lines.
Green tea has antioxidant properties and protects against skin aging.

DESCRIPTION:

Designed as a “second skin” the Collagen Veil is made of fibres obtained via freeze drying. On its way into the skin the native collagen can combine with water soluble active ingredients from ampoules and serums, making collagen one of the strongest delivery systems known in cosmetics.

ACTIVE INGREDIENTS:

Collagen:

- Hydrates with so much moisture that a “hydrophilic net” is formed across the surface of the skin.
- Due to the compatibility of collagen with the skin, this moisture is retained for a prolonged period of time, giving a plump, firm result and minimizing fine lines.

AHAs – Glycolic Acid

- Glycolic Acid has an antibacterial and exfoliating action. This treatment will reduce spots and reduce scarring that is often associated with acne.
- Exfoliation promotes cellular growth and the development of new skin is encouraged.

Green Tea: C, E, B vitamins, A provitamins, polyphenols, chlorophyll, theine

- Stimulates immunity against harmful UV exposure
- Visibly slows down skin aging

RESULTS:

Firms and regenerates the skin, restores radiance and smoothes fine lines and wrinkles.

APPLICATION FREQUENCY:

As part of treatment series: Once or twice a week

For maintenance: Once or twice a month

Daily home care: Firming Cream and Sun Protection Cream on sunny days
Skin Renewing Serum and Skin Renewing Cream in the evening
