

G I N K G O C O L L A G E N

Softness and radiance

Designed for skin types sensitive to diffuse redness, but also for anyone seeking comfort and a soothing effect for their skin.

DESCRIPTION:

A beauty treatment combining three care products: A Collagen Veil, enriched with Ginkgo Biloba extract, known for its phlebotonic properties, Collagen Activator with mucopolysaccharides and the Sensitive Serum with soothing and softening plant extracts .

ACTIVE INGREDIENTS:

Freeze Dried Native Collagen Fibres:

- Prolonged moisturising of the epidermis
- Moistened by the Activator, the Veil promotes the transfer of active ingredients through its occlusive effect

Ginkgo Biloba:

- Boosts the resistance of the capillaries, facilitates return circulation and strengthens vein tone

Mucopolysaccharides:

- Improves cutaneous flexibility and elasticity.
- Preserves the moisture level and activate cellular transfer

Vitamin A:

- Softens and nourishes. Smoothes surface texture

Vitamin E:

- Neutralizes free radicals
- Helps the skin to fight against outside aggressions by enhancing its natural defences

Extracts of Horse Chestnut, Burdock and Hamamelis:

- Reduce redness and rashes brought on by exposure to the weather

RESULTS:

Reduces diffuse redness: Provides an immediate soothing sensation. The complexion is unified and small purplish red lacing fades, leaving the skin superbly smooth.

Moisturises and protects: Relieves skin in need of support and comfort, and alleviates tingling

Application

Apply Sensitive Serum

Apply and moisten mask with Activator

Leave mask on for 30 minutes

Remove mask

To end treatment, apply Hydro Sensitive Cream

APPLICATION FREQUENCY:

As part of treatment series: Once or twice a week

For maintenance: Once or twice a month

At home

Daily care: Hydro Sensitive Cream

Intensive care: Sensitive Serum in the evening under the moisturiser
