Lightening treatment

A correcting treatment to prevent the appearance of skin imperfections and to prevent the signs of ageing.

DESCRIPTION:

An original formula that is rich in lightening complexes and inhibits the formation of melanin, regardless of the age and type of skin. This extensive treatment also counters the harmful effects of aging .

ACTIVE INGREDIENTS:

Extract of Red Mulberry:

Has a neutralising effect on the action of the enzyme tyrosinase which triggers the production of melanin by the melanocytes.

Extract of Scutellaria Root:

Rich in flavonoids, well known for its skin lightening effect.

Extract of Saxifrage:

Contains tannins which are effective "traps" for free radicals generated by sunlight.

Extract of Arbutin:

A natural molecule that enhances depigmentation, and acts effectively without side-effects.

Grape Juice (red vine):

A powerful anti-oxidant, it visibly lightens the dark- coloured melanin and blocks the activities of tyrosinase.

Alpha-Hydroxy Acids or "A.H.As":

Boosts the natural exfoliation of the skin. Optimises and promotes the absorption of the active ingredients.

Stabilised Vitamin C:

Blocks the melanin formation process and effectively contributes to lightening the complexion.

RESULTS:

Reduces & corrects brown spots: Recent pigment spots are visibly attenuated and lightened. Also acts on pigmentation caused by sunlight, pregnancy or aging.

Generates skin cleanness and uniformity: Reveals a lighter complexion, leaving the grain of the skin smoother, clearer and more uniform. The skin regains its radiance.
